

# Loading Arm Handle

## Help Improve Safety and Functionality

Help improve the safety and functionality of your OPW Loading Arm System with new Loading Arm Handles. OPW Loading Arm Handles bolt on to 2", 3", 4" and 6" diameter loading arm pipes that help improve loading arm ergonomics and maneuverability. Loading arm handles are available as part of a new loading arm configuration or they can be retrofitted to existing loading arms.

### Key features include:

- Available in 2", 3", 4" and 6"
- 12"-wide handle with 5" clearance
- Available in aluminum or stainless steel
- Single- or double-sided configurations
- Can retrofit existing loading arms

### Example Order:
