FUELED BY EXCELLENCE

# CLEANENERGY FUELING PRODUCTS

Helping You Make the World a Greener, Cleaner Place.

We are dedicated to continuous innovation in the design, engineering and manufacture of high-quality components used for alternative fueling applications, such as CNG (compressed natural gas). A division of OPW, the global leader in fueling solutions since 1892, CleanEnergy Fueling Products is a name synonymous with innovation, quality, reliability and Customer service. OPW CleanEnergy Fueling Products offers you a complete selection of alternative fueling products to meet your specification. Each product is designed and built to exacting standards for your fueling safety and efficiency.

You believe that blue skies, clean water and being green are good business. Through environmentally safe, alternative fueling systems, we can have a world of cleaner air, cleaner water and sustainable fueling. OPW CleanEnergy Fueling Products is Leading the Way in fueling your future, offering global solutions for Compressed Natural Gas products, including Nozzles, Breakaways, Adaptors and Factory Tested Hose Assemblies.

## CNG Fueling Nozzles (NGV1 & ISO14469)

OPW CleanEnergy Fueling Products offers an extensive line of CNG Fueling Nozzles to meet a wide variety of fueling applications. OPW CNG nozzles are used throughout the world.

### NT2AP30 (Type 2 or 3)

The NEW NT2A Series nozzle is designed to be versatile for all of your Type-2 CNG fueling applications. The NT2A has true Class-A specified durability and will optimize your time-fill, fast-fill and fleet fueling sites. The ergonomic design, positive locking jaws and best in class internal seals will make this nozzle the preferred choice of your operators.

### NT2AP36 (Type 2 or 3)

### CNG Type 2 Fueling System

The OPW CleanEnergy CNG 3-Way Valve and Type 2 Nozzle features the latest in industrial and commercial fueling innovations. A Fueling System which bridges the gap between convenience and comfort, without sacrificing flow or reliability. Ergonomically designed to be easy to use and prevent unnecessary wear and tear during the fueling process.

### 1000 Series (Type 1)

OPW 1000 Series self-service nozzles are designed for high-flow public and private CNG fueling systems. Applications include quick-fill, self-service fueling of automobiles, light trucks, shuttle buses and vans.

### 5000 Series (Type 1)

OPW 5000 Series nozzles are designed for extremely high-flow public and private CNG fueling systems. Applications include quick-fill, self-service fueling of transit buses and large trucks.

### 6000 Series (Type 2)

OPW 6000 Series nozzles are designed for extremely high-flow public and private CNG fueling systems when connected to OPW CL50 series receptacles. Applications include quick-fill, self-service fueling of transit buses and large trucks.

### BDN Vehicle Defueling Nozzle

OPW has developed this tool to safely depressurize vehicles. This valve can also be used to transfer fuel from one vehicle to another in the event of a breakdown on the side of the road, or be used in areas where no refueling station is available.

## NT2A Series General Purpose Nozzles (NGV1 & ISO14469, Type 2 or 3)

The NEW NT2A Series nozzle is designed to be versatile for all of your Type-2 CNG fueling applications. The NT2A has true Class-A specified durability and will optimize your time-fill, fast-fill and fleet fueling sites. The ergonomic design, positive locking jaws and best in class internal seals will make this nozzle the preferred choice of your operators.

### Materials

- Body:** Brass
- Jaws:** Stainless steel
- Seals:** Specially formulated polymers and elastomers specific to high pressure NGV applications.

### Features

- ◆ **User-Friendly Push-On/Pull-Off Operation** - For smooth, simple engaging and disengaging of nozzle and receptacle without the added step of pulling back a collar. The NT2A is designed to remain securely connected to the receptacle until the nozzle is depressurized after fueling is complete.
- ◆ **Type** - Designed as a Type 2 or 3 nozzle.
- ◆ **Jaw-Lock Technology** - Designed specifically for the frequent coupling and uncoupling of the high-pressure gas connections of NGV fueling. Forces at the contact point are distributed over the entire surface area of the receptacle.
- ◆ **Ergonomic Design** - Has a comfortable specially designed Duratuff sleeve. Also incorporates stainless steel front sleeve for those hard to reach receptacles.
- ◆ **Durable Construction** - Brass & Stainless Steel construction provides excellent corrosion resistance in the harsh refueling environment.
- ◆ **Safe Disconnect** - Accidental disconnection under pressure is very difficult due to our unique force multiplier design.
- ◆ **Meets NGV1 and ISO14469 Fueling Standard** - Can be used to fuel any vehicle with approved profile receptacle.

### Specifications:

Min. Flow Rate: 2340 SCFM @ 3000 PSID  
 Temperature Range: -40° F to 185° F  
 (-40° C to 85° C)  
 Cv: 1.22  
 MAWP: 4532 psi (312.5 Bar)

### Ordering Specifications

Product #	Inlet Thread Size	Color	Service Pressure	Weight.
NT2AP30	SAE - 6, 9/16" - 18 UNF	Blue	NGV1 P30 ISO14469 B200 3000 psi (200 bar)	1.30 lb. 0.59 kg
NT2AP36	SAE - 6, 9/16" - 18 UNF	Yellow	NGV1 P36 ISO14469 B200 3600 psi (250 bar)	1.30 lb. 0.59 kg

Connects to any L-Series-NGV-1 CNG Receptacle

ISO14469**

## CNG Type 2 Fueling System

The OPW CleanEnergy CNG 3-Way Valve and Type 2 Nozzle features the latest in industrial and commercial fueling innovations. A Fueling System which bridges the gap between convenience and comfort, without sacrificing flow or reliability. Ergonomically designed to be easy to use and prevent unnecessary wear and tear during the fueling process.

## NT2A Series Fast-Fill/Fleet-Fill Nozzles (NGV1 & ISO14469 Type 2 or 3)

OPW NT2A Series Fast-Fill/Fleet-Fill Nozzles are designed for high-flow CNG fueling systems. Applications include quick-fill fueling of automobiles, light trucks, shuttle buses, vans and time-fill or overnight fleet fueling.

Product #	Inlet Thread Size	Color	Service Pressure
NT2AP30	SAE - 6, 9/16" - 18 UNF	Blue	NGV1 P30 ISO14469 B200 3000 psi (200 bar)
NT2AP36	SAE - 6, 9/16" - 18 UNF	Yellow	NGV1 P36 ISO14469 G250 3600 psi (250 bar)

### Materials

### Features

- ◆ **Hose Connection Options** - Time-Fill Applications - 4/4 Sized Hose (1/4" Inlet and 1/4" Vent). Fast-Fill Applications - 4/6 Sized Hose (3/8" Inlet and 1/4" Vent)
- ◆ **Ergonomic Grip** - Duratuff® Grip provides maximum user comfort and control
- ◆ **Duratuff® Shell** - Specifically designed to handle operational wear-and-tear as well as protecting your vehicle from dents and scratches during fueling.
- ◆ **CNG Type 2 Fueling System Extension Options** - Offers the convenience of connection flexibility. Operators can connect to vehicles regardless of the application. Use one of four different connection options; 3/4", 45°, 4" Rigid or 17" Flex Hose to help in fueling difficult-to-reach receptacles or tanks.
- ◆ **NT2A Series Nozzle** - Feature a field serviceable internal filter to capture gas-borne debris commonly found in CNG Fueling systems.

### Listings and Certifications

**NGV1 ISO14469**

## DR-36/30 Nozzle Docking Receptacle

This is a Nozzle Docking receptacle to be used ONLY for Type-2 & Type-3 nozzle mounting purposes. There are no working internals, therefore it may only be used as a docking storage device. **NOTE:** It shall not be used to dock a Type-1 nozzle.

### Ordering Specifications

Product #	Description
DR-36/30	Nozzle Docking Receptacle

### Nozzle Types

- Type 1** - Nozzle with an integrated vent valve system. This vent valve is controlled by the single lever operation which will safely vent the gas trapped between the receptacle check valve and the nozzle inlet valve. After the venting process, the nozzle will disconnect from the vehicle's receptacle.
- Type 2** - The vent valve operating mechanism is external to the nozzle. Venting is required prior to disconnection of this type of nozzle.
- Type 3** - The fueling hose is automatically depressurized below 50psi (3.4Bar) at dispenser shutdown. The nozzle will vent low pressure gas between the receptacle check valve and the nozzle inlet valve.

**NOTE:** This device shall not be installed on a vehicle nor be connected to a pressurized source of any type.

## CNG Type 2 Fueling System

### FOUR EXTENDER OPTIONS TO CHOOSE FROM

## Ordering Specifications

Product #	Description	Connection		Approx. Weight	Service Pressure
		Fill	Vent		
3WV-44	3-way valve, cover and outlet tubing, connections				
3WV-44A	3-way valve, cover, outlet tubing				
3WV-44B	3-way valve, cover, outlet tubing and 45 degree extender	4- <small>SAE-AN</small>	4- <small>SAE-AN</small>	1.4 lb. (.63 kg)	up to 5,000 psi / 345 bar

3WV-46D	3-way valve, cover, outlet tubing and whip-hose extender				
3WV-46AP30	3-way valve, cover, outlet tubing and 3/4" extender and NT2AP30				
3WV-46BP30	3-way valve, cover, outlet tubing and 45 degree extender and NT2AP30	8- <small>SAE-AN</small>	4- <small>SAE-AN</small>	2.74 lb. (1.24 kg)	3,000 psi / 200 bar
3WV-46CP30	3-way valve, cover, outlet tubing and 4" rigid extender and NT2AP30				
3WV-46DP30	3-way valve, cover, outlet tubing and whip-hose extender and NT2AP30				
3WV-46AP36	3-way valve, cover, outlet tubing and 3/4" extender and NT2AP36				
3WV-46BP36	3-way valve, cover, outlet tubing and 45 degree extender and NT2AP36	8- <small>SAE-AN</small>	4- <small>SAE-AN</small>	2.74 lb. (1.24 kg)	3,600 psi / 250 bar
3WV-46CP36	3-way valve, cover, outlet tubing and 4" rigid extender and NT2AP36				
3WV-46DP36	3-way valve, cover, outlet tubing and whip-hose extender and NT2AP36				

## CT1000 Series Self-Service Nozzles (NGV1 & ISO14469 Type 1)

OPW 1000 Series Self-Service Nozzles are designed for high-flow public and private CNG fueling systems. Applications include quick-fill, self-service fueling of automobiles, light trucks, shuttle buses and vans.

### Dimensions

	CT1000P36S / CT1000LS	
	in	mm
A	7.32	185.8
B	1.94	48.9
C	4.0	102.1
D	4.69	119.4
E	8.19	208.0
F	Straight Thread O-ring Boss Port SAE-6 J1926 (9/16" - 18 UNF-2B)	
G	2.01	51.2
H	0.72	18.4

### Materials

Body: Brass

Jaws: Stainless steel

Seals: Specialty polymers and elastomers for NGV applications

CT1000P36S  
Coupling End

CT1000P36S  
Hose Connection End

### Features

- ◆ **High-Flow/Fast-Fill Capability** - provides quick fueling of medium storage vehicles. Internal seals are designed for fast-fill NGV fueling.
- ◆ **User-Friendly Single-Action Operation** - engage nozzle and receptacle with a 180° rotation of the handle. This secures nozzle jaws onto receptacle, activating a system of three internal valves that regulate fueling. The nozzle will not dispense gas until securely engaged onto an appropriate receptacle. When fueling is complete, rotate the handle to the disconnect position to automatically stop the flow of gas into the vehicle, vent the trapped gas and release the nozzle from the receptacle. The 1000 Series nozzles connect directly to the hose, with no need for a three-way valve. Designed for public or private self-service applications, no attendant is needed.
- ◆ **Directed Vent (CT1000)** - captures the gas vented at disconnect and directs it out of the nozzle via a 1/4" stainless steel vent tube (requires -4 compression adaptor), which can be piped to a remote venting location or back to the upstream side of the compressor. Capturing vent gas is environmentally desirable by agencies such as the EPA and provides an added measure of safety by minimizing the amount of gas present at the filling site. It also reduces vent noise and eliminates escaped gas smell.
- ◆ **Jaw-Lock Technology** - designed specifically for the frequent coupling and uncoupling of the high-pressure gas connections of NGV fueling. Forces at the contact point are distributed over the entire surface area of the receptacle.
- ◆ **Ergonomic Design** - one simple and convenient motion ensures connection and dispensing by all users. Insulated jacket protects operator's hand.
- ◆ **Durable Construction** - heavy-duty brass and stainless steel construction provides corrosion resistance in the harsh refueling environment.
- ◆ **Tamper Resistant** - specially designed cam system actuates the front and rear module. Tampering with the valve results in immediate dispensing shut-off.
- ◆ **Individually Leak Tested and Inspected with Traceable Serial Number**

### Specifications:

Min. Flow Rate: 1200 SCFM @ 3000 psid  
Temperature Range: -40° F to 185° F  
(-40° C to 85° C)

Cv: 0.84

MAWP: 4532 psi (312.5 Bar)

## Materials

**Body:** Brass

**Jaws:** Stainless steel

**Seals:** Specially formulated polymers and elastomers specific to high-pressure NGV applications.

CT5000S Coupling End

CT5000S Hose Connection End

## Features

- ◆ **High-Flow/Fast-Fill Capability** - to provide quick fueling of large storage vehicles. Internal seals are specially designed to meet the demands of fast-fill NGV fueling.
- ◆ **User-Friendly Single-Action Operation** - entire fueling operation is initiated by simply engaging nozzle and receptacle with a single 180° rotation of the handle. This automatically secures the nozzle jaws onto the receptacle and activates a system of three internal valves that regulate fueling. The nozzle will not dispense gas until securely engaged onto an appropriate receptacle. When fueling is completed, rotation of the handle to the disconnect position automatically stops the flow of gas into the nozzle, vents the trapped gas and releases the nozzle from the receptacle. The 5000 Series nozzles connect directly to the hose, eliminating the need for a three-way valve. They are designed for public or private self-service applications, eliminating the need for a trained attendant.
- ◆ **Directed Vent** - directs the gas vented at disconnect and directs it out of the nozzle via a 3/8" stainless steel tubing connection (requires -6 compression adaptor), which can be piped to a remote venting location or back to the upstream side of the compressor. Directing the vent gas is environmentally desirable and will provide an added measure of safety by minimizing the amount of gas present

at the filling site. It also reduces vent noise and escaped gas smell.

- ◆ **Jaw-Lock Technology** - designed specifically for the frequent coupling and uncoupling of the high-pressure gas connections of NGV fueling. Forces at the contact point are distributed over the entire surface area of the receptacle.
- ◆ **Ergonomic Design** - one simple and convenient motion ensures connection and dispensing by all users. Insulated jacket provides thermal protection for operator's hand.
- ◆ **Durable Construction** - brass and stainless steel construction provides excellent corrosion resistance in the harsh refueling environment.
- ◆ **Tamper Resistant** - specially designed cam system actuates the front and rear valve module. Any tampering with the valve will result in an immediate shut-off of the dispensing process.
- ◆ **Individually Leak Tested and Inspected with Traceable Serial Numbers**

## Specifications:

CNG

## CC6000 Series Bus/Heavy-Duty Truck Nozzles (NGV1 & ISO14469, Type 2)

OPW 6000 Series nozzles are designed for extremely high-flow public and private CNG fueling systems. Applications include quick-fill, self-service fueling of transit buses and large trucks. This Type 2 nozzle must be used with some type of secondary flow control valve that either vents down only the nozzle or the nozzle and hose.

### Materials

**Body:** Stainless steel; acetal

**Jaws:** Stainless steel

**Seals:** Specially formulated polymers and elastomers specific to high-pressure NGV applications.

CC6000  
Coupling End

CC6000  
Hose Connection End

### Features

- ◆ **High-Flow/Super Fast Fill Capability** - OPW's fastest flowing nozzle. This nozzle will provide quick fueling of large storage vehicles. Internal seals are specially designed to meet the demands of fast-fill NGV fueling.
- ◆ **User-Friendly Push-On/Pull-Off Operation** for smooth, simple engaging and disengaging of nozzle and receptacle without the added step of pulling back a collar. The CC6000 is designed to remain securely connected to the receptacle until the nozzle is depressurized after fueling is complete.
- ◆ **Type** - designed as a High-Flow Type 2 nozzle used in conjunction with CL50 receptacles.
- ◆ **Jaw-Lock Technology** - designed specifically for the frequent coupling and uncoupling of the high-pressure gas connections of NGV fueling. Forces at the contact point are distributed over the entire surface area of the receptacle, significantly reducing nozzle wear.

- ◆ **Ergonomic Design** - has a comfortable "tool-grip" like all other OPW Type 2 nozzles.
- ◆ **Durable Construction** - heavy-duty stainless steel construction provides excellent corrosion resistance in the harsh refueling environment.
- ◆ **Individually Leak Tested and Inspected With Traceable Serial Numbers**

### Specifications:

Min. Flow Rate: 5000 SCFM @ 3000 psid  
Temperature Range: -40° F to 185° F  
(-40° C to 85° C)

## Materials

**Body and Internal Components:**  
316L stainless steel

**Seals:** Specially formulated polymers and elastomers specific to high-pressure NGV applications.

## Features

- ◆ **Durable Corrosion-Resistant Construction** - stainless steel and brass provide improved durability and corrosion resistance in the harsh environments. All wetted components are CNG fuel compatible.
- ◆ **Jaw-Lock Connection** - to ensure against damage to the receptacle during the defueling process.
- ◆ **User-Friendly Operation** - low force actuation lever provides enough mechanical advantage to open receptacle check valves with up to 4500 psi pressure differentials.
- ◆ Shaft extenders are included inside the handle to open receptacle check valves.

- ◆ **NOTE:** Remove Filter from Receptical if present.
- ◆ **SAE -6 O-ring Outlet Port** allows for standard fittings to be used when connecting nozzle to hose.
- ◆ Check valves installed on the vehicle, behind the receptacle, will prevent the BDN from functioning.
- ◆ **Individually Leak Tested and Inspected with Traceable Serial Numbers**
- ◆ **CRN'S Pending**

## Specifications:

MAWP: 6250 psi (430 bar)

## BDN Vehicle Defueling Nozzles

OPW tool to safely depressurize vehicles. This valve can also be used to transfer fuel from one vehicle to another in the event of a breakdown on the side of the road, or in areas where no refueling station is available. This nozzle should be hooked up to a check valve, three-way valve, hose and appropriate storage tank or fueling device.

## Ordering Specifications

Product #	Outlet Thread Size	Service Pressure		Weight
BDN for CNG Service	SAE -6, 9/16" 18 UNF	NGV1P30 profile JAW w/3600 psi rated service pressure	ISO14469 B200 JAW w/250 bar rated service pressure	3 lb. (1.35 kg)

## CNG Fill-Line and Vent Line Breakaways and Accessories

OPW in-line breakaways are installed on fuel dispensing hoses between the nozzle and dispenser and will separate when subjected to a designated pull force, such as in the event of a drive-away. The dual valves seat automatically upon separation to stop the flow of gas while protecting the dispensing equipment from catastrophic damage. Defueling nozzles are designed to safely depressurize vehicles and can be used to transfer fuel from one vehicle to another. The fueling hoses are specially designed for dispensing compressed natural gas.

### Fill-Line Breakaway (FLB-1000) Standard Duty

OPW has optimized the in-line breakaway for use in automotive NGV refueling applications. This unit will function consistently, independent of the inlet pressure.

### Fill-Line Breakaway (FLB-5000) Heavy-Duty Truck/Bus

OPW has optimized the in-line breakaway for use in heavy-duty truck and bus NGV refueling applications. This unit will function consistently, independent of the inlet pressure.

### Vent Line Breakaway (NGVLB)

The OPW NGVLB is an in-line breakaway that fits into the nozzle vent line. This new pressure balanced NGVLB unit will function consistently when used in conjunction with OPW high pressure In-line breakaways in the event of a drive-away.

### In-Line Breakaway (ILB-1)

Designed for medium flow and automotive NGV and hydrogen refueling applications. This unit will function consistently, independent of the inlet pressure.

### In-Line Breakaway (ILB-5) – Heavy-Duty Truck/Bus

Designed for high flow and heavy-duty truck and bus NGV and hydrogen refueling applications. This unit will function consistently, independent of the inlet pressure.

### CNG Hose Retractor

OPW CNG Hose Retractors keep excess hose off the ground and out of the way, prolonging hose life and reducing potential hazards.

### Gages - RINGGO

Available for easily measuring worn receptacles, which may lead to connection/disconnection issues resulting from brinelling or other damage.

### Gages - JAWGO

Available for easily measuring worn nozzles, which may lead to connection/disconnection issues resulting from brinelling or other damage.

## Materials

**Body:** Stainless steel

**Internal Components:** Stainless steel

**Seals:** Specially formulated polyurethane seals to withstand high pressure NGV applications

FLB-1000

## Features

- ◆ **High-Flow/Fast Fill Capacity** - This NGV1 breakaway will provide quick fueling of large vehicles.
- ◆ **Durable, Corrosion-Resistant Construction** - stainless steel construction provides improved durability and corrosion resistance in harsh environments.
- ◆ **Reconnectable Design** - allows the component to be reused, reducing total cost of ownership
- ◆ **Innovative Valve System** - the sealing system in this breakaway minimizes the amount of vent gas released during a drive-away incident.
- ◆ **Reduced Size and Weight** - to allow for more applications where size may be a concern.
- ◆ **Easy Installation** - the in-line breakaway has SAE-6 O-ring fittings for easy installation in line between the dispenser and nozzle.
- ◆ **Disconnection Force** - 120 lbs. (+/- 30 lbs.) (534+/- 134 N).
- ◆ **100% Leak and Breakaway Tested, with Traceable Serial Numbers**

## Fill-Line Breakaway (FLB-1000) - Standard Duty

OPW has optimized the in-line breakaway for use in automotive NGV refueling applications. This unit will function consistently, independent of the inlet pressure.

### Specifications:

Max Flow Rate: 3,700 SCFM @ 3,600 psid

Temperature Range: -40° F to 185° F  
(-40° C to 85° C)

Cv: 1.85

MAWP: 4,532 psi (312.5Bar)

(Includes NGVLB Breakaway)

A Offset = 0.429"  
(10.9mm)

B Offset = 2.917"  
(74.1mm)

## Materials

Body: Stainless steel

Internal Components: Stainless steel

Seals: Specially formulated polyurethane seals to withstand high pressure NGV applications

FLB-5000

## Features

- ◆ **High-Flow/Fast Fill Capacity** - this is OPW's fastest flowing breakaway. This breakaway will provide quick fueling of large vehicles.
- ◆ **Durable, Corrosion-Resistant Construction** - stainless steel construction to provide improved durability and corrosion resistance in harsh environments.
- ◆ **Reconnectable Design** - allows the component to be reused, reducing total cost of ownership
- ◆ **Innovative Valve System** - the sealing system in this breakaway minimizes the amount of vent gas released during a drive-away incident.
- ◆ **Reduced Size and Weight** - to allow for more applications where size may be a concern.
- ◆ **Easy Installation** - the in-line breakaway has SAE-10 O-ring fittings for easy installation in line between the dispenser and nozzle.
- ◆ **Disconnection Force** - 120 +/- 30 lbs. (534 +/- 134 N).
- ◆ **100% Leak and Breakaway Tested, with Traceable Serial Numbers**

## Materials

**Body:** Stainless Steel

**Internal Components:**  
Stainless Steel

**Seals:** Specially formulated seals, specific to high pressure NGV applications

NGVLB

## Features

- ◆ **Durability** - Stainless-steel construction provides improved performance, durability and corrosion resistance in harsh environments.
- ◆ **Reconnectable** - Allows the component to be reused, reducing maintenance cost.
- ◆ **Pressure Balanced** - Performance stability eliminates nuisance separation due to pressure surges in the vent line.
- ◆ Passive design allows pressure to freely move through the vent line.
- ◆ Disconnection force of 40 lbs. ± 15 lbs. (178N ± 67N)
- ◆ **No tools required for reconnection** (12 lbs./53 N reconnection force).

- ◆ **100% Leak and Breakaway Tested, with Traceable Serial Numbers**

## Specifications:

Pressure balanced to 18,129 psi (1,250 bar)

Temperature Range: -40° F to 185° F  
(-40° C to 85° C)

Cv: 0.24

1,000 SCFM @ 3,600 psi (250 bar)

MAWP: 4,532 psi (312.5 bar)

## OPW Vent Line Breakaway (NGVLB)

The OPW NGVLB is an in-line breakaway that fits into the nozzle vent line. This new pressure balanced NGVLB unit will function consistently when used in conjunction with OPW high pressure In-line breakaways.

## Ordering Specifications

Product #	Inlet Thread Size	Outlet Thread Size	Service Pressure		Weight
NGVLB	SAE - 6, 9/16" - 18 UNF	SAE - 6, 9/16" - 18 UNF	3600 psi	250 bar	0.22 lb (0.1 kg)

## In-Line Breakaway (ILB-1)

Designed for medium flow and automotive NGV refueling applications. This unit will function consistently, independent of the inlet pressure.

## Materials

**Body:** Stainless steel

**Internal Components:** Stainless steel

**Seals:** Specially formulated polymers and elastomers specific to high-pressure NGV applications.

## Features

- ◆ **High-Flow** - the flow path has been matched to provide ample flow for all NGV-1 Type 1 and Type 2 nozzles.
- ◆ **Durable, Corrosion-Resistant Construction** - stainless steel and specially plated steel construction provide improved durability and corrosion resistance in harsh environments.
- ◆ **Reconnectable Design** - allows the component to be reused, reducing maintenance costs.
- ◆ **Innovative Valve System** - the sealing system in this breakaway minimizes the amount of vent gas released during a drive-away incident.
- ◆ **Reduced Size and Weight** - to allow for more applications where size may be a concern.
- ◆ **Easy Installation** - the in-line breakaway has SAE-6 O-ring fittings for easy installation in line between the dispenser and nozzle.
- ◆ **Disconnection Force**-150 lbs. (668 N).
- ◆ **Individually Inspected, Leak and Breakaway Tested, with Traceable Serial Numbers**

## Specifications:

Min. Flow Rate: 2000 SCFM @ 3000 psid

## CNG Hose Retractor

OPW CNG Hose Retractors keep excess hose off the ground and out of the way, prolonging hose life and reducing potential hazards.

## CNG Hose Retractor Sample Configuration

CNG Hose, Nozzle, Breakaways and mounting post are not included.

### Features

- ◆ **Easy-to-use** - the spring loaded reel and stretch resistant cable provide smooth and steady tension throughout hose extension and return.
  - ◆ **Robust reel** - designed especially for heavy-duty CNG fueling applications.
  - ◆ **Easy to maintain** - the removable side plate provides full access to the mechanism for easy tension adjustment and unit maintenance.
  - ◆ **Hose Retractor Breakaway** - seamlessly connects with Hose Clamp to protect Hose Assemblies.
  - ◆ **Compact and versatile design** - that can be easily installed under a fast-fill dispenser canopy or on a time-fill fueling post.
  - ◆ **Innovative Hose Clamp** - multiple designs to fit standard NGV-1 and heavy-duty hose combinations.
- \* A convenient safety thumb screw is provided to lock the reel in place during tension adjustment.

#### Mounting Dimensions

## L SERIES

OPW L Series fueling receptacles are designed for use on medium storage natural gas vehicles, including automobiles, light trucks, shuttle buses and vans.

### Features

#### ◆ High-Flow Capacity

The L Series receptacles have much larger flow capacity than conventional receptacles. The flow path allows very high flows, combined with low pressure drop and enhanced resistance to hydrate formation.

#### ◆ Durable, Corrosion-Resistant Construction

All OPW receptacles are made from stainless steel.

#### ◆ Non-Contact Check Valve

Each OPW receptacle contains a highly reliable non-contact check valve that opens only when differential pressure is present during fueling.

#### ◆ Unique Sealing System

The sealing system in all OPW receptacles consists of a stainless steel poppet that aligns with a rearward facing, captured seal located in the receptacle body. This arrangement prevents: seal "wash-out" during high-flow conditions and "cratering" due to debris. The seal material has exceptionally long service life, resists creep and deformation and has exceptional wear resistance under all operating pressure and temperature conditions. The poppet is treated, impact-resistant stainless steel with a polished surface to provide reliable sealing at low back pressures.

#### ◆ Bulkhead or Straight Thread

The L Series allows the user to order a complete receptacle or buy and assemble their own adaptor shaft. They come with and without bulkhead fitting and with or without filter. The external bulkhead nut costs less than conventional stainless steel fittings. L Series receptacles can be used with

parallel thread or compression tube fittings. L Series bodies come with either wrench flats or hex to ease vehicular mounting.

#### ◆ Filtered Receptacle (LE)

Filters capture dirt and gas-borne debris commonly found in CNG systems. Filtered receptacles protect the receptacle seals and the vehicle fuel system. A 50-micron filter is incorporated ahead of the receptacle check valve.

#### ◆ Design Your Own Sub-System

The OPW L Series receptacles come with the following standard features: rubber dust cap, mounting hex or wrench flats. LD and LE receptacles come with a standard external bulkhead nut.

The bulkhead fittings allow the use of inexpensive compression tube fittings. A 50-micron filter upstream of the poppet seal is available as an option. All adaptor shafts can be purchased from OPW or from your supplier of choice.

OPW L Series Receptacles are designed for medium storage NGV at 200 Bar (3000 psi) or 250 Bar (3600 psi) operating pressure.

#### ◆ Rubber Dust Cap

Standard protective dust caps are supplied with all receptacles.

#### ◆ Serviceable O-ring

Designed to prevent leakage at the connection point.

## CNG Receptacles

OPW offers a complete line of fueling receptacles for any natural gas vehicle (NGV) application. Our receptacles form part of a dedicated system designed specifically for fueling NGV.

## Materials

**Body and Adaptor Shaft:** Stainless steel

**Internal Components:** Stainless steel

**Seals:** Specially formulated polymers and elastomers specific to high-pressure NGV applications.

## Features

- ◆ **High-Flow** - the flow path has been optimized to increase the amount of flow and decrease the pressure drop resulting in a reduction of noise and vibration from the check valve.
- ◆ **Durable, Corrosion-Resistant Construction** - stainless steel construction provides improved durability and corrosion resistance in the harsh on-highway, heavy-duty environment.
- ◆ **Non-Contact Check Valve** - each OPW CL series receptacle contains a highly reliable non-contact check valve that opens when differential pressure is present during refueling.
- ◆ **Sealing System** - the sealing system in all CL series receptacles consists of a stainless steel poppet that aligns with a rearward facing captured seal located in the receptacle body. This

arrangement prevents seal "wash out" during high-flow and has exceptional wear resistance under all operating pressure and temperature conditions.

- ◆ **Rubber Dust Cap** - a standard protective dust cap is supplied with CL50 series receptacles.
- ◆ **Serviceable O-ring** - designed to prevent leakage at the connection point.
- ◆ Connects to CT5000S and CC6000 series heavy-duty CNG nozzles

## Glossary of Terms

**Interchangeability Between Service Pressures** – The nozzle and receptacle have been designed such that to prevent a vehicle from being fueled by a higher rated dispenser than a lower rated vehicle service pressure. However, a lower rated dispenser system can fill a higher service pressure vehicle. This is controlled by the geometry of the receptacle and nozzle.

**Nozzle Types** – There are three types of nozzles:

- a. **Type 1** – This is a nozzle with an integrated vent valve system. This vent valve is controlled by the single lever operation which will safely vent the gas trapped between the receptacle check valve and the nozzle inlet valve. After the venting process, the nozzle will disconnect from the vehicle's receptacle.
- b. **Type 2** – The vent valve operating mechanism is external to the nozzle. Venting is required prior to disconnection of this type of nozzle.
- c. **Type 3** – The fueling hose is automatically depressurized below 50psi (3.4Bar) at dispenser shutdown. The nozzle will vent low pressure gas between the receptacle check valve and the nozzle inlet valve.

**Nozzle Class** – There are two nozzle classifications, Class A and Class B

- a. **Class A nozzle** – This nozzle has a high frequency of use, with a cycle life of 100,000 fueling cycles. This is approximately 100 fills per day for 3 years.
- b. **Class B nozzle** – This nozzle has a medium frequency of use, with a cycle life of 20,000 fueling cycles. This equates to approximately 10 fills per day for 5 years.

**Receptacle Design Life** – All receptacles are designed to be capable of a minimum of 10,000 connection/disconnection cycles to be compliant to ISO14469 and NGV1.

**Breakaway Design Life** – All breakaways are designed to be capable of a minimum of 102,000 fill cycle events to meet the NGV4.4 Standard.

### Pressure Meanings

**Service Pressure** – OPW CNG products are designed to operate to pressures specified in ISO-14469 for Europe (World), NGV1 for North America. Defined as the settled pressure at a uniform gas temperature, World (15C), North America (70F)

- a. For North America the service pressures are 3000psi and 3600psi. NGV1 P30 and P36 & P30HD, P36HD.
- b. For Europe (World) the service pressures are 200bar and 250bar. ISO14469 B200, C200 and B250, C250.

### Maximum Allowable Working Pressure (MAWP)

For all OPW Clean Energy products the MAWP is 1.25 times the rated service pressure.

### Standard the Product is Certified to:

- a. NGV1, NGV4.4, ISO14469 and PED 2014/68/EU, E,110R

**Certifying Agencies:** Will be marked clearly on product

### Generic Terms:

**Breakaway Device** – OPW sells “hose breakaways”. These are items that are downstream of the dispenser and connected to it by a whip hose. This will allow the breakaway to align to the direction of pull during a drive off event.

**C<sub>v</sub>** – Flow Coefficient lets one compare the capacities of valves at different sizes, types and manufacturers. C<sub>v</sub> combines the effects of all flow restrictions in the valve into a single number. When comparing flow rates, a higher C<sub>v</sub> value indicates higher flow (less flow restriction), whereas a lower C<sub>v</sub> value indicates lower flow (higher flow restriction).

**Go – No Go or Fit Gage** – A go-no go or fit gage is designed to test the wear on the jaws and front sleeve of OPW nozzles, or to test the condition of an NGV receptacle.

#### 1. Nozzle:

- a. If the nozzle go-no go gage (JAWGO-1, JAWGO-5) connects properly to the Go side it's considered good, as long as it cannot connect to the No Go side. If the nozzle can connect to the No Go side or cannot connect to the Go side then the front sleeve and jaws of the nozzle should be replaced (replacement kits available).
- b. If the nozzle go-no go gage proves the jaws to be good, yet the jaws won't connect to the vehicle's receptacle, the receptacle should be replaced.

#### 2. Receptacle:

- a. If the receptacle fit gage (RINGGO-0001) connects properly to the receptacle it is considered good. If the receptacle cannot connect to the fit gage then the receptacle should be replaced.
- b. If the receptacle fit gage proves the receptacle to be good yet the nozzle will not connect to the vehicle's receptacle, the nozzle jaws and front sleeve should be replaced (replacement kits available).

**NPT Threads** – OPW does not use NPT threads on its products. According to NGV1, “The use of threaded connections which rely on the joint between the male and female threads for sealing, such as NPT threads, is prohibited.”

**NGV Profile** – A receptacle that is NGV1 approved must comply with the geometry set forth in the NGV1 standard. Receptacles that meet NGV1 will not have interchangeability restrictions and will permit the safe connection/disconnection of the fueling nozzle.

### Retail Fueling

Components and products to protect the environment and the consumer at retail fueling sites for conventional and alternative fuels.

### Dispensers, Payment & Automation Systems

Manufacturing a complete range of fuel dispensers, pumps and automation systems for the global retail fueling market.

### Electronic Systems

Innovative electronic tank gauges and fuel control systems to ensure customers know how much fuel they have and where it is going. Also, Automated Vehicle Wash Systems.

### Chemical & Industrial

Safe and efficient loading and unloading of critical hazardous chemicals: loading arms, swivel joints, sight flow indicators, quick and dry disconnect couplers, and safety breakaways.

### Transportation

Components and systems for use on Tank Trucks and Rail Tank Cars to ensure the safe handling, loading, transport and unloading of hazardous bulk products, including: petroleum, chemical and dry bulk cargo.
